

MARYLAND FOOD STAMP CHANGE TOKENS

JANUARY 2002

EDWARD L. CRAIG
MD TAMS LM#22

INTRODUCTION

The purpose of the following draft of the new reference on Maryland Food Stamp Change Tokens is my initial attempt to catalog these relatively overlooked Maryland tokens. In producing this first draft, I have relied on numerous articles by Mr. Neil Shafer and information and articles provided by Mr. Lee Quast. The former provided a historical perspective and interesting data on the United States Department of Agriculture (UDSA) program throughout its various phases, while the latter provided me with critical information on most of the Maryland items that I have catalogued. Thanks also to Mr. Paul Cunningham and Mr. Lee Quast who both helped me expand my collection of Maryland Food Stamp Change Tokens.

It is my sincere hope that you will search your Maryland token collections and provide me with any additional data available. As you will see in the reference, I am aware of several locations/merchants that issued tokens that I do not have. If you have them or can share the related information, I will add these to the reference with the proper documentation in the correct format. It is my intent to publish this reference in final in 2004; hopefully, your input will help make this reference as complete as possible.

I also encourage each and every member of the Maryland Token and Medal Society to pick an area of collecting interest and develop your own reference on some yet undocumented area of Maryland Numismatics or exonumia. We need to capture this very perishable information before it is too late.

Edward L. Craig
MD TAMS LM#22

MARYLAND FOOD STAMP CHANGE TOKENS

Most everyone has heard of various United States Government subsistence plans to include the Food Stamp Program. Many of you have probably been in line at the local grocery store and have seen someone paying their bill with special government script called "Food Stamps". This program is managed by the U.S. Department of Agriculture (USDA) and has been around since about 1939. The program began as a result of the Depression that gripped the United States in the 1930's. It was a program by the government to allow low-income families and those families receiving government assistance to have greater purchasing power when they bought food on the local economy.

How may you ask does this relate to collecting tokens? Let me explain. At various times since the inception of the program, the USDA mandated that when Food Stamps were redeemed, that change provided by the merchant not be in legal United States tender. This led to the use of both credit slips/forms and tokens for making change. Most recent programs have seen the use of round plastic change tokens. Based on my findings to date, it appears that several Maryland merchants also used metal tokens. I will discuss all such Maryland tokens known to me later in this reference. For now it may be useful to provide a bit more history to help put all of this in context.

In some recent articles in Numismatic News (27 March and 1 May 2001 "Duly Noted" columns), Mr. Neil Shafer documented some very useful and interesting research he had done concerning Wisconsin Food Stamp Change. Subsequently, I found out that Mr. Shafer had written significantly more material on the food stamp program. I would like to thank Mr. Shafer for his work which added just the right background for me since I had been collecting Maryland Food Stamp tokens for some time but knew very little about the actual program. What follows is some historical perspective as taken directly or gisted from Mr. Shafer's articles.

Shafer references a USDA pamphlet he acquired and quotes a section on Questions and Answers for Retailers and Wholesalers which contains the following question and answer. "How do retailers make change for food coupons? Unendorsed 50-cent (and later the \$1) coupons may be used in making change. If an amount less than 50-cents (later \$1) is required, the food coupon shopper has the option of paying in cash or accepting a credit slip from the retailer for future delivery of an equivalent value of eligible foods. A credit slip or bill cannot exceed 49 cents (originally 24 cents, later 99 cents when used in food coupon transactions. Examples: (a) If a customer buys \$9.50 worth of food and tenders five \$2.00 coupons in payment, he may be given one 50-cent coupon in change. (b) If a customer buys 60 cents worth of food, one 50-cent coupon may be given the cashier plus 10 cents in cash; or if the customer gives the cashier two 50-cent coupons for a 60 cent purchase, the cashier could give as change a credit slip for 40 cents." Beside credit slips and depending on the Phase of the program, change was sometimes made using tokens.

The UDSA Food Stamp/Coupon Program has evolved through several distinct phases. I will rely on Mr. Shafer's description of the three phased evolution. "...Phase I encompassed the period from 1939 to early 1943 which saw the inception of the original Food Stamp Plan. It operated much the same as " the later phases: " stamps sold at a discount, redeemed at full face value by the government, and grocers having to make change in material other than in U.S. coin. A scattering of issues of tokens, scrip, and due bills is known from Phase I but as a group it's very small. Most were simply never saved. Phase II began in mid-1961 and lasted until the end of 1970. During this time the Program was revived from the old Plan of the '30's, modified and enlarged as it gained momentum until by the end of 1970 all but six states were participating in whole or in part. Once again the stores were required to use coin substitutes for 49c or less, but in an abrupt and surprising move this gave way to a new regulation early in 1971 which did allow the use of U.S. coin for changemaking. Thus ended Phase II ...". Mr. Shafer notes that there is a decent amount of Phase II material still around and therefore collectable. He managed to locate at least one item from every state in the program as of 1970. The use of U.S. coin did not last long (January 1971 to March 1972). The policy was reversed and Phase III began in 1 March 1972 and stores were back to making change the old way. This lasted until the end of 1978.

One of the most interesting aspects of this program was the fact that the government mandated the use of non-U.S. coins directly causing a new field of tokens, scrip, and exnumia to surface. Beside the diverse types of credit slips, paper stamps & coupons, the tokens that arose from this need were metal, fiber, plastic and even wood. Mr. Shafer found a store in Aberdeen, South Dakota that used both a 5c and 10c wooden token. The majority of the more recent tokens are round plastic; however, there are a few exceptions.

The following is a list of all Maryland Food Stamp Change tokens that I have had access to or of which I have become aware.

OLDER METAL MARYLAND FOOD STAMP CHANGE TOKENS

The first group of and assumed to be older, metal tokens are listed in the Maryland Merchant Token book compiled and written by Mr. David Schenkman. (Page numbers below refer to Schenkman's book.)

- A. Obverse: BALTIMORE MARKETS/1/FOOD STAMP/CREDIT/NOT TRANSFERRABLE
Reverse: GOOD FOR/1/FOOD ONLY
Brass, 17mm (see page 13)
- B. Obverse: BALTIMORE MARKETS/5/FOOD STAMP/CREDIT/NOT TRANSFERRABLE
Reverse: GOOD FOR/5/FOOD ONLY
Brass, 20mm (see page 13)
- C. Obverse: BALTIMORE MARKETS/1/FOOD STAMP/CREDIT/NOT TRANSFERRABLE
Reverse: GOOD FOR/1/SURPLUS FOOD ONLY
Aluminum, 17mm (see page 14)

D. Obverse: BALTIMORE MARKETS/5/FOOD STAMP/CREDIT/NOT TRANSFERRABLE
Reverse: GOOD FOR/5/SURPLUS FOOD ONLY
Aluminum, 20mm (see page 14)

Note: Mr. Schenkman indicates that the Baltimore Market tokens were probably used in the 1940's.

E. Obverse: SCHREIBER/BROS, INC./FOOD STAMP/REGULAR
Reverse: 1 (within circle of rays)
Brass, 18mm (see page 100)

F. Obverse: SCHREIBER/BROS, INC./FOOD STAMP/REGULAR
Reverse: 5 (within circle of rays)
Brass, 19mm (see page 101)

G. Obverse: SCHREIBER/BROS, INC./FOOD STAMP/REGULAR
Reverse: 10 (within circle of rays)
Brass, 22mm (see page 101)

H. Obverse: SCHREIBER/BROS, INC./FOOD STAMP/SURPLUS
Reverse: 1 (within circle of rays)
Aluminum, 18mm (see page 101)

I. Obverse: SCHREIBER/BROS, INC./FOOD STAMP/SURPLUS
Reverse: 5 (within circle of rays)
Aluminum, 19mm (see page 101)

J. Obverse: SCHREIBER/BROS, INC./FOOD STAMP/SURPLUS
Reverse: 10 (within circle of rays)
Aluminum, 22mm (see page 101)

Note: Mr. Schenkman indicates that Schreiber Brothers started business in the 1920's.

MARYLAND PLASTIC FOOD STAMP CHANGE TOKENS

The next group of Food Stamp Change tokens are plastic. They are from the 1970's timeframe when the USDA asked that the tokens contain the words "in eligible foods only".

OBVERSE: These tokens show the merchant and related information on the obverse. Unless otherwise noted, the obverse writing is white. The size of the obverse writing can vary in both size and script style. The location with the most tokens is not suprisingly Baltimore with several other locations having only one known set of tokens. The tokens below are listed alphabetically by Maryland location.

REVERSE: These tokens all have the same reverse wording:
FOOD STAMP CREDIT/"DENOMONATION"/IN ELIGIBLE FOODS

The possible denominations are: 1, 5, 10, 25, and 50 cents. The denomination portion of the below listing shows each denomination known for that merchant. This section can be used to mark the ones you have in your collection. Normal denomination color scheme for these tokens is as follows:

Black - 1c
 Green - 5c
 Blue - 10c
 Red - 25c
 Purple - 50c

Note1: Several merchants used Bronze 50c tokens. This is noted where applicable.

Note2: Some tokens have no white writing on the reverse. These issues are plain plastic with the UDSA words in raised letters. These are noted where applicable.

STATEWIDE:

Giant Foods, headquartered in Landover, Maryland has stores all over the state of Maryland. They issued at least two different styles of tokens. One is round, thin plastic. The colors used on these were as follows: White: 1 Cent; Yellow: 5 Cent; UNK: 10 Cent; Robins Egg Blue: 25 Cents; and UNK: 50 Cents.

Obverse: GIANT FOODS INC./"DENOMINATION"/FOOD STAMP CREDIT TOKEN
Reverse: Redeemable/ only in/Eligible/Foods.

The second style is square, thin plastic with writing on only one side. It appears that all the obverses are white with different reverse colors and different colored writing on the obverse.

DENOMINATION: OBV COLOR/REV COLOR/WRITING COLOR

1 Cent: White/White/Black
5 Cents: White/Red/Red
10 Cents: UNKNOWN
25 Cents: UNKNOWN
50 Cents: UNKNOWN

Obverse: FOOD STAMP/CREDIT TOKEN/"DENOMINATION"/ REDEEMABLE ONLY/
IN ELIGIBLE FOODS/AT GIANT FOOD/"GIANT G TRADEMARK"
Reverse: Blank

DO YOU HAVE ANY FOOD STAMP TOKENS FROM THE FOLLOWING BUSINESSES?

Thanks to some documentation provided to me by Mr. Lee Quast, I know that there are several merchants who have used modern, plastic food stamp tokens which I do not have or have access to so I cannot at this time document them properly in the format used for the other tokens. I will list these here to help document the issues as best I can and to prompt others who might have same to provide me with copies or the actual documentation. These issuers are as follows:

EDGEWATER:

Earle's Super Market 171 Mayo Rd. (2 Types) (1,5,10,25,50)

ELKTON:

Northside Market 701 Bridge Street (1,5,10,25,50)

FEDERALSBURG:

Federalsburg IGA #140 109 Morris Avenue (Type I) (1,5,10,25,50)

FREDRICK:

Woody's Cash Market 500 N. Market Street (1,5,10,25,50)

FRUITLAND:

Fruitland Market IGA 308 Main Street E. (1,5,10,25)

GLEN BURNIE:

Daddy Logan's Baking Co. RT 2 Box 389 Warterview Ave. (1,5,10,25,50)

LONACONING:

Lanoconing Grocery 53 Jackson Street (1,5,10,25,50)

MILLINGTON:

Millington Market (1,5,10,25,50)

SILVER SPRING:

Commercial Food Center 8200 Piney Branch Road (1,5,10,25,50)
